Actas del IV Congreso Internacional de Enseñanza Bilingüe en Centros Educativos

CIEB 2017

En el IV Congreso Internacional de Enseñanza Bilingüe en Centros Educativos (CIEB 2017) se presentaron para su valoración un total de 92 comunicaciones y 31 talleres.

Tras la revisión de todas las propuestas por parte del Comité Científico, se aceptaron un total de 80 comunicaciones, siendo rechazadas 12 propuestas, y un total de 27 talleres, siendo rechazados cuatro propuestas. No obstante, no todos los participantes enviaron su artículo para su publicación dentro del plazo previsto.

Por tanto, en estas Actas no se recogen las ochenta comunicaciones y los veintisiete talleres que fueron presentadas oralmente durante el Congreso, sino solamente las treinta y dos comunicaciones y los cuatro talleres cuyo texto completo fue recibido, revisado, evaluado y aceptado por los editores para su publicación. El Programa completo del Congreso puede consultarse en la página web del congreso: <http://www.cieb.es/>.

Para la publicación de la Actas del Congreso, se propone un formato digital con ISBN. En el siguiente gráfico, se muestra un resumen de los datos finales.

PRESENTACIÓN IV CONGRESO INTERNACIONAL DE ENSEÑANZA BILINGÜE EN CENTROS EDUCATIVOS “LA ENSEÑANZA BILINGÜE A DEBATE”

La Universidad Rey Juan Carlos y la Asociación Enseñanza Bilingüe, fueron los organizadores del IV Congreso Internacional de Enseñanza Bilingüe en Centros Educativos –CIEB 2017– que se celebró en Madrid, en el Campus de Vicálvaro de la Universidad Rey Juan Carlos los días 20, 21 y 22 de octubre de 2017.

CIEB 2017, bajo el lema “La enseñanza bilingüe a debate”, planteo no solamente seguir analizando su funcionamiento sino también debatir sobre la enseñanza bilingüe, los programas, sus ventajas e inconvenientes, su desarrollo y su gestión, sus resultados, con el fin de contribuir a la búsqueda de soluciones para los problemas que se plantearon y por lo tanto, a la mejora de la calidad de todos los programas.

Un objetivo prioritario fue generar un foro de discusión, de debate, de intercambio de ideas y de experiencias entre profesionales de la enseñanza bilingüe y la enseñanza de idiomas y, a la vez, apoyar a los miles de maestros y profesores que han entendido perfectamente el potencial que supone ofrecer enseñanzas bilingües a sus alumnos, y que trabajan incansablemente, esforzándose por adquirir el mayor dominio de la lengua de instrucción y las máximas competencias posibles, tratando de incorporar a su labor docente los últimos avances tecnológicos y de utilizar en la enseñanza de idiomas, las variadas metodologías activas en boga hoy en día.

El Congreso CIEB 2017 como siempre tuvo un carácter innovador y promovió la presencia de expertos nacionales, tanto en aspectos prácticos como teóricos del bilingüismo.

DIGITAL RESOURCES THAT WORK IN BILINGUALISM

Paula López Cabello

Raquel de Nicolás

CEIP Gonzalo Fernández de Córdoba, Madrid

Abstract: The use of new technologies has changed methodology among teachers all over the world. This has accordingly affected our teaching practice, primary education in our case.

Students learn now in a more interactive, manipulative, creative and motivational way.

The aim of this workshop is to share our knowledge and experience when using different digital resources. Teachers do not work in isolation and we consider that sharing ideas is the best way to enrich our students' learning.

Exploring the Internet and finding the right resources for our classes is not easy and it is very time-consuming and that is why we decided to do research on websites which could be useful in our English and science lessons.

Key words: Methodology-primary-digital resources-motivation

Resumen: El uso de las nuevas tecnologías ha cambiado la metodología de los profesores en todo el mundo. Esto ha afectado a nuestra práctica docente, en educación primaria en nuestro caso.

La manera de aprender de los alumnos es ahora más interactiva, manipulativa, creativa y motivadora.

El objetivo de este taller es compartir nuestro conocimiento y experiencia en el manejo de los recursos digitales. Los docentes no trabajamos de forma aislada y consideramos que la mejor manera de enriquecer el aprendizaje de los alumnos es intercambiando experiencias,

Explorar internet y encontrar los recursos adecuados para nuestras aulas no es tarea fácil y lleva mucho tiempo. Por ello, decidimos realizar esta investigación de páginas web que podrían ser útiles en nuestras clases de inglés y de ciencias.

Palabras Clave: Metodología-primaria-recursos digitales-motivación

Introduction

Attitude is a little thing that makes a big difference

Winston Churchill

"Knowledge grows when shared" and that is our purpose in this workshop today, to share with you our experience when using various digital resources which have been successful in our classes.

Motivation and interaction are two very powerful tools that will engage our students to work in and outside the classroom through technology. Our students are digital natives and technology motivates them intrinsically. That reality should make us think that our methodology must take full advantage of that fact. New methodological concepts, such as "flipped classroom", allow us to apply new techniques which will revolutionize our teaching practice. Digital resources on our classroom blogs, for

example, present new concepts to our students, attend to diversity and to students' different learning paces and styles. Students learn at home what was previously taught in the classroom. When they come to class, they can explain what they have learnt in their own words and the time in class is spent putting that input into practice. That way they are more responsible for their own learning. It's a more student-centred approach.

Our role as teachers in this 21st century has become that of "guides" and "facilitators". Our students are genuinely curious and eager to learn new things. We should help them develop their own critical thinking and distinguish what's important from what's superfluous. As educators ourselves, we understand that the needs of teachers are as diverse as the students that fill their classrooms.

Given the amount of digital resources available on the Internet, it is sometimes difficult to discriminate the useful ones from the not so good ones. Sometimes, we come across interesting English websites for science, but we soon realise they are too complex for our primary students, either because of the contents themselves or because of the language involved.

Too often, these sites are not free and their basic options are rather limited. Sometimes, they offer free subscriptions for a period of time and then you have to pay a yearly amount to continue using it. In other cases, you need to pay in order to obtain a premium or a plus version, where you have access to more resources.

We are going to mention a few of them and they have been divided into two sections. The first one involves a series of websites that provide readily available materials to be used online (on smartboards, computers or classroom blogs). The other one refers to websites where teachers can create their own materials and adapt them to their own context.

Websites with readily available materials:

These websites help teachers review or expand knowledge on the contents students are studying in class. This is a good way to check students' learning and comprehension. In this sense, primary education students develop and experience a sense of confidence and emotional security.

Our goal when using digital resources is to support the holistic development of learners. This means the students gain motivation, content and language knowledge and skills, while becoming learners who seek information in an active way and make use of opportunities for successful communication. Websites are the best resource to connect the students' new information with their own existing knowledge, skills and attitudes.

It is important for a student to feel confident and inspired when working on new sites. Learning through websites helps students activate previously acquired knowledge and create new relational links -such as language or background knowledge- needed to do complex work.

Choosing the best and most suitable websites is hard work for teachers. Sometimes, it happens that the links do not open, they have changed or the contents are not adequate for the level. It is very time consuming when planning our lessons to

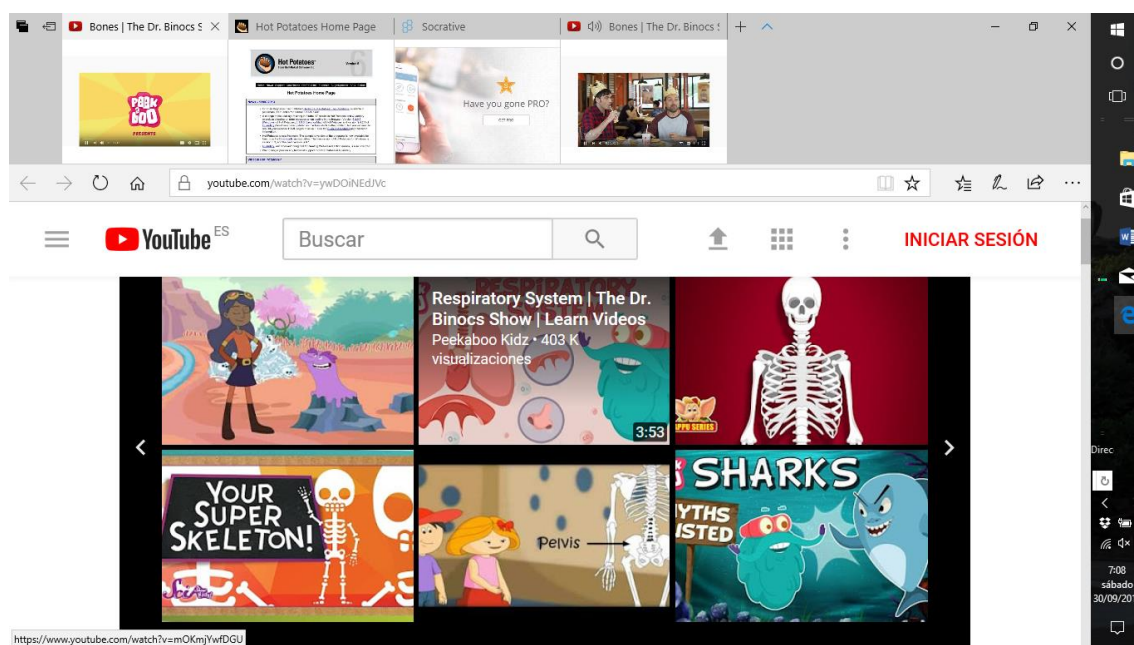

continually check websites to include in our plan. There are just a few publishing houses which have worked on this kind of research.

When working with websites, teachers need to bear in mind a new methodology and the way students are going to work (in pairs, in groups, or individually). Each type of grouping implies a different goal. How and what we learn depend very much on the company we keep because meaning is created through a social process.

Here are a few examples of websites and a short explanation about contents and what they can be used for.

- Dr Binocs is a great link where teachers can find a huge number of videos connected to social and natural sciences in a very visual, motivating and clear English language. This selection is about the human body:

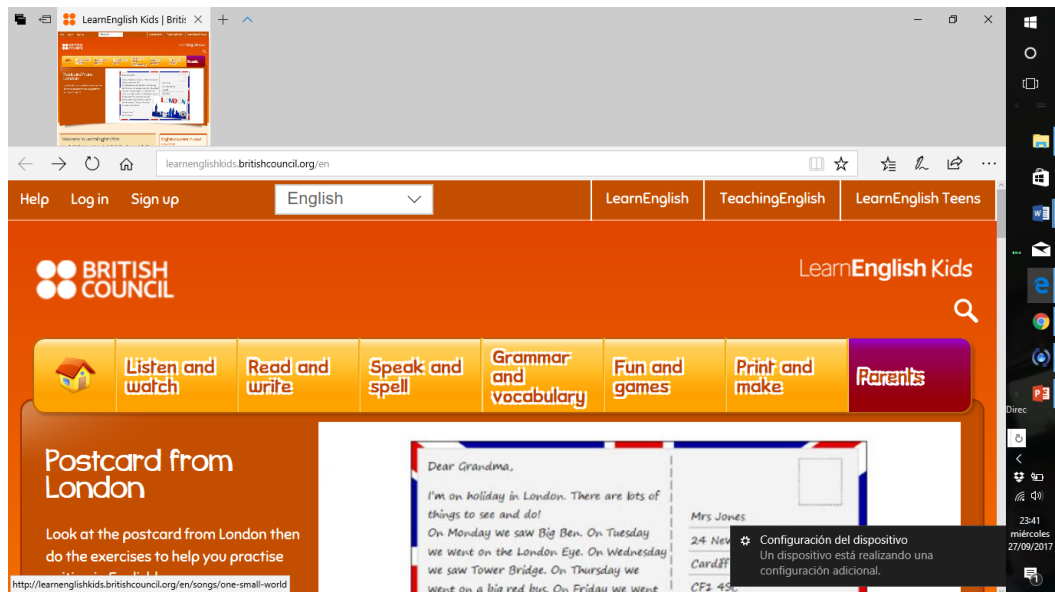

<https://www.youtube.com/watch?v=ywDOiNEdJvc>

- <http://learnenglishkids.britishcouncil.org/en/>

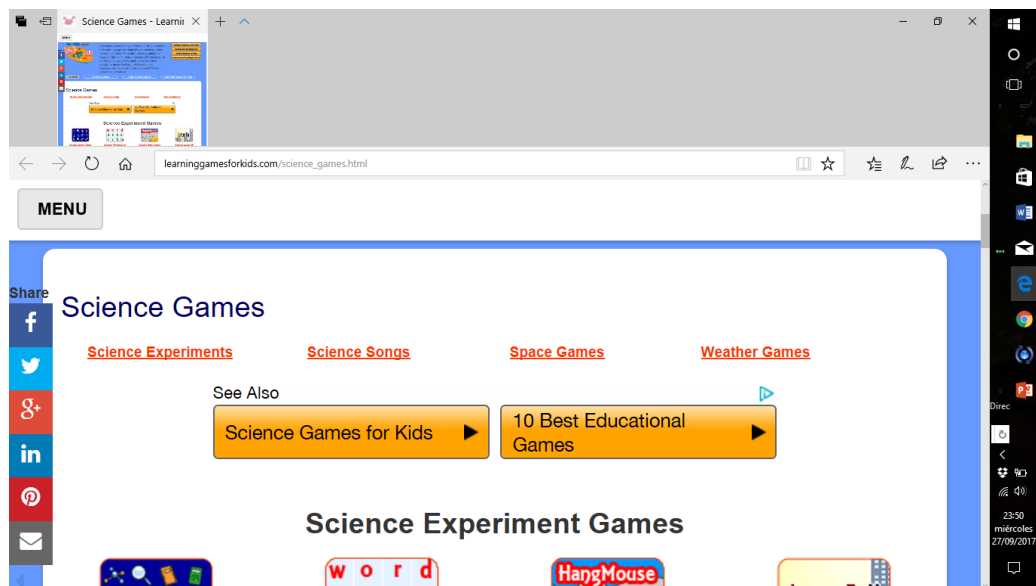

Learn English Kids is brought by the British Council, which implies English teaching experts. On this website teachers may find lots of free online games, songs, stories and activities for children. There are also articles for parents supporting children in learning English, videos on using English at home and information about courses around the world.

This website is especially indicated for primary students aged between 6 and 10 years old to practice 4 skills in English language. It is very suitable for reading and writing. It also contains lots of ideas for arts and crafts lessons using the English language as a tool for communication (CLIL).

- http://www.learninggamesforkids.com/science_games.html

This page is suitable for younger pupils between 6 and 8 years old. It is good for science games, with songs and jigsaws. It is enjoyable and motivating when students start learning science.

- <http://www.enchantedlearning.com/Home.html>

Enchanted Learning® produces web sites which are designed for children to develop their imagination, creativity, learning and enjoyment. This material is very clear and it shows a simple computer interface. The navigation and control are intuitive.

Useful information:

What do subscribers get?

- You get access to all the content of the Enchanted Learning website – over 35,000 pages.
- No banner ads! You get an ad-free version of the site plus extra printing capabilities (printer-friendly pages and the ability to enlarge images).
- Site subscribers can access the members' website from ANY Internet-connected computer using their logins.
- Memberships last for a full year, beginning when you join and expiring on the same date in the following year.
- Note: We do NOT do automatic renewals.

We have 2 levels of subscriptions:

- Personal/family/single-teacher subscription - \$20.00 for one year - You will receive a username and password which you can use to log onto the site from any Internet-connected computer(s).
- Single school subscription - \$125.00 for one year - A school receives a single username and password which all the staff can use to log on. Staff members can log on from school, home, or any Internet-connected computer(s).

EnchantedLearning.com
Halloween K-3 Theme Page
 Rhymes, [Crafts](#), Quizzes, Information, and Coloring Printouts

Halloween falls on the last day of October, October 31.

These crafts projects are for preschool, kindergarten and elementary school children. The crafts use materials found around the house, like egg cartons, cardboard, paper, boxes, string, crayons, paint, glue, etc. See [a page about color mixing](#) to see how to combine paint to make all the colors of the [rainbow](#).

[Go to a Pumpkin Theme Page](#)

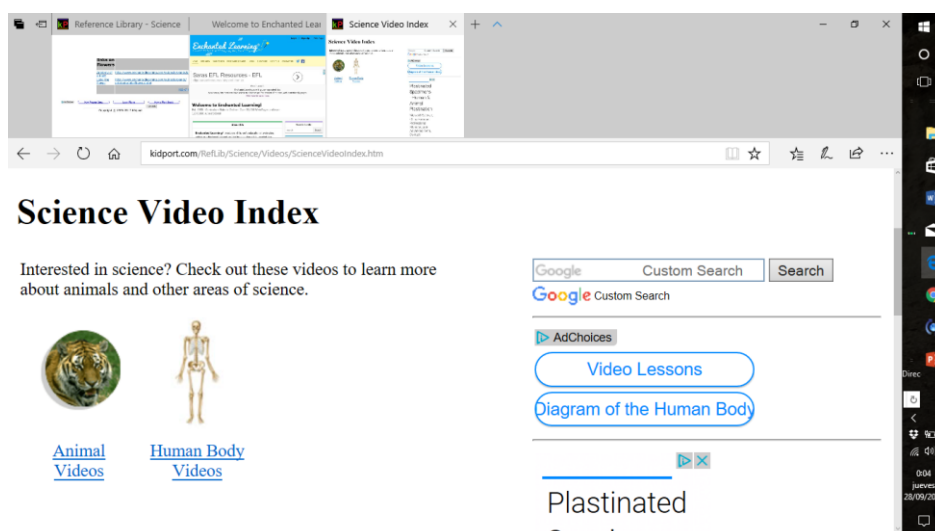

[Click Here for K-3 Themes](#)

Activities for Halloween

[All](#) [Rhymes](#) [Crafts](#) [Books to Print](#) [Drawing, Coloring Worksheets](#) [Spelling Worksheets](#) [Writing Worksheets](#) [Math](#) [Nametags](#) [Various Languages](#) [Miscellaneous](#)

- <http://www.kidport.com/RefLib/Science/HowPlantsGrow/HowPlantsGrow.htm>

This page is good for videos especially for students between 6 and 10 years old. You can find videos about animals or the human body.

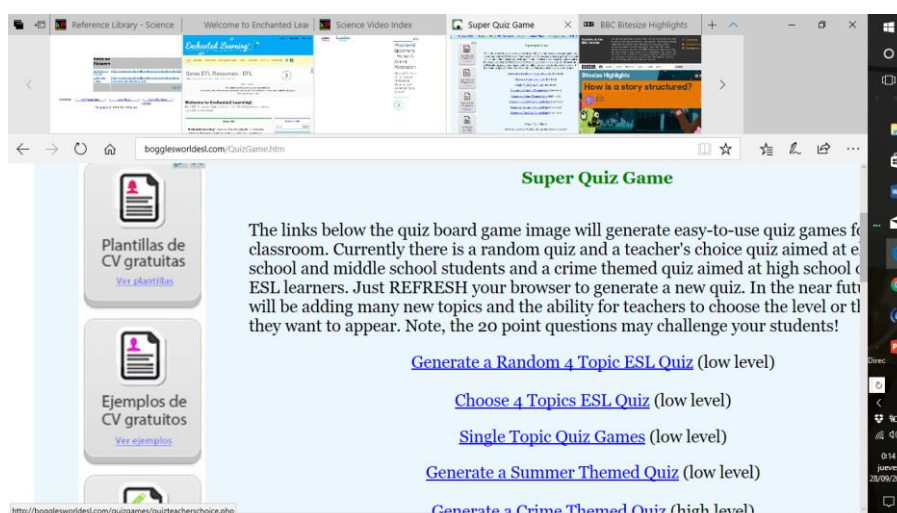

- <http://bogglesworldesl.com/>

LANTERNFISH contains printable teaching resources for language arts, TESOL, TEFL and ESL.

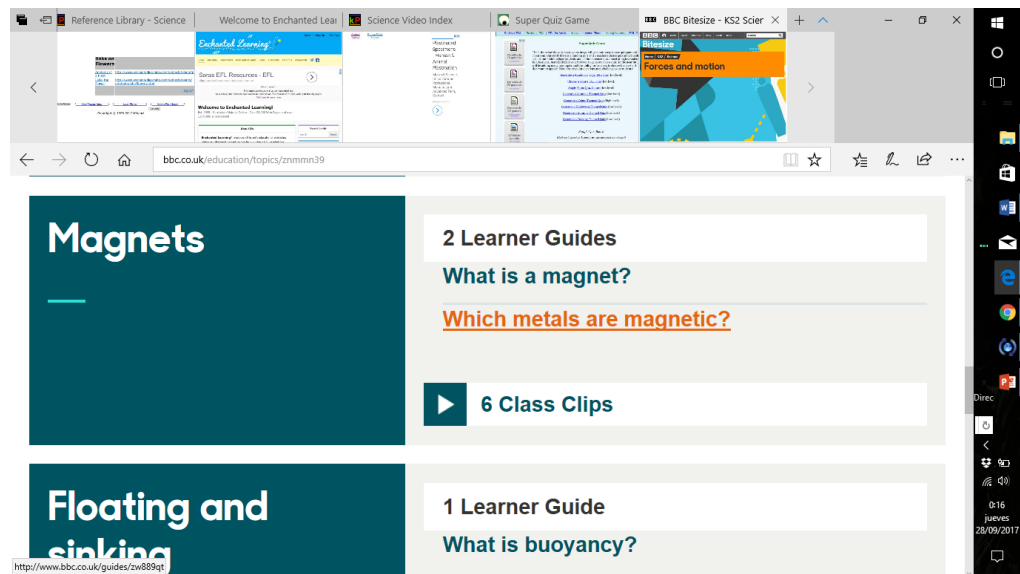

This website contains different sections:

- Word Skills Cloze Activities: this section contains worksheet generators for reviewing word skills such as synonyms, antonyms, categories, past tense, and naming.
- Large Flashcards: into one section.
- Job Fair: A Role-play: A new lesson where students role-play job seekers and employer to practice their interviewing skills
- Seasonal Links to foster communicative skills for different occasions: spring, St Patrick's day, Easter, April Fool's day
- Quiz and content questions games
- Rhyming riddles
- Common English proverbs

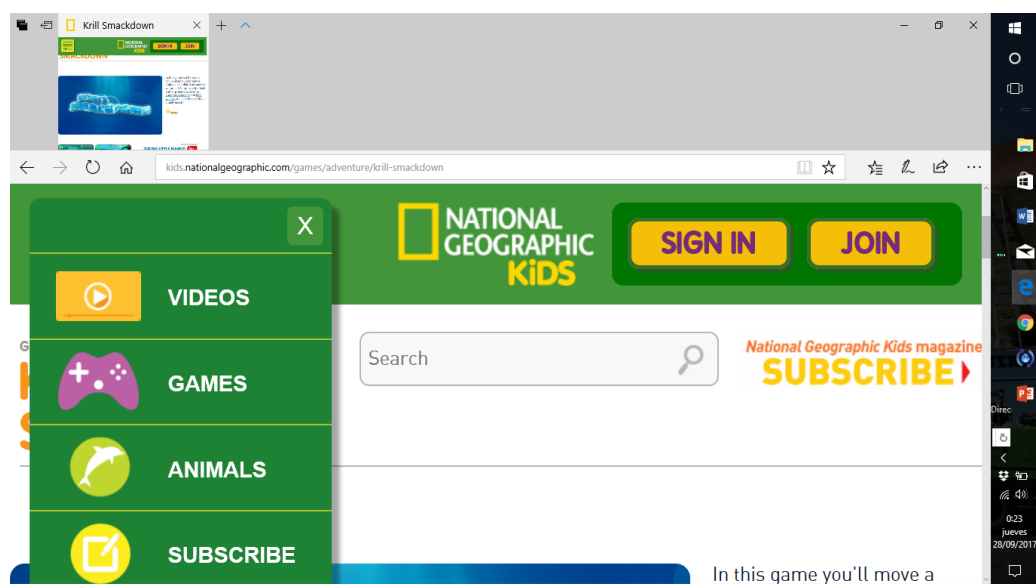

- <http://www.bbc.co.uk/education/highlights>

This website contains educational highlights either for English language and Science to be taught through CLIL methodology. It is suitable for students between 8 and 10 years old because the explanations are very clear with nice pictures and the language is very simple to be followed.

- <http://kids.nationalgeographic.com/>

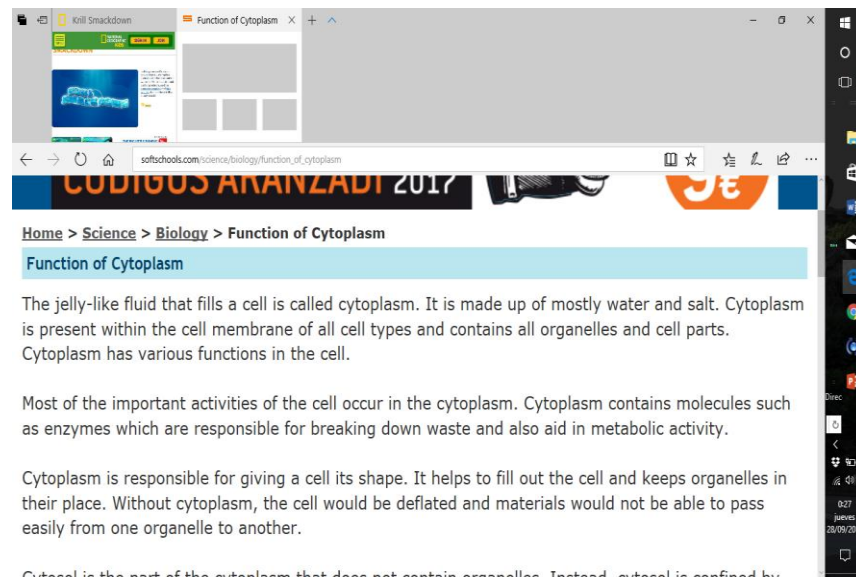

This is a very useful website for parents because it keeps them updated on what their child is doing and its participation on the link. The kids feel free to explore any topic they feel interested in. This develops their critical thinking and allows them to make decisions. It is a safe place where kids can explore learning about animals, science, and nature, all in an environment that encourages curiosity, wonder and exploration.

- <http://softschools.com/>

SoftSchools.com provides free math worksheets, free math games, grammar quizzes, free phonics worksheets and games. Worksheets and games are organized by grades and topics. These printable math and phonics worksheets are auto generated.

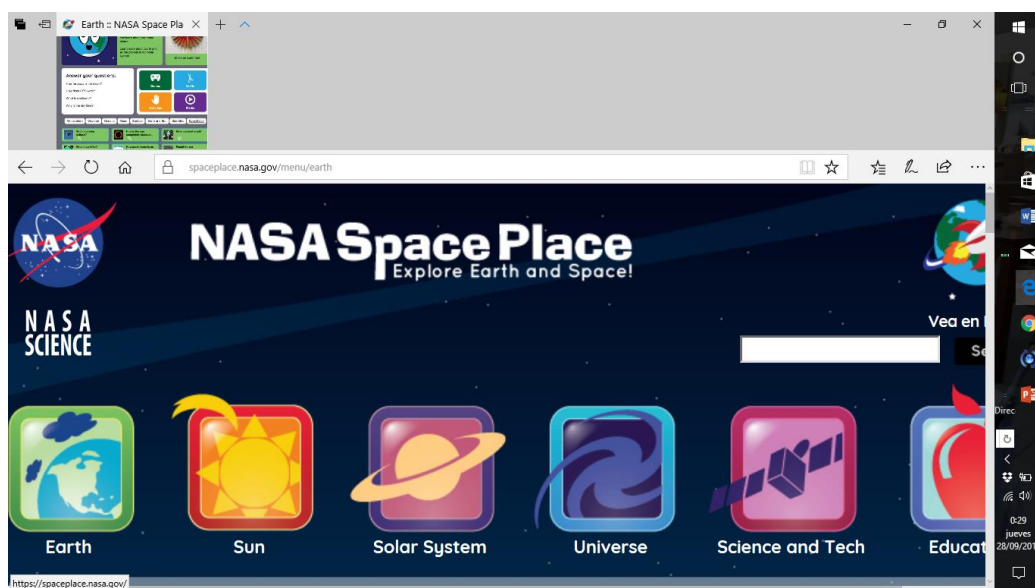

This page is interesting when preparing a quiz or reading comprehension questions. For instance, it is good for students in 5th grade of Primary to study the cell.

- <https://spaceplace.nasa.gov/>

This page is recommended for students between 6 and 10 years old. Pictures are very attractive and colorful; they may look a bit childish for older students.

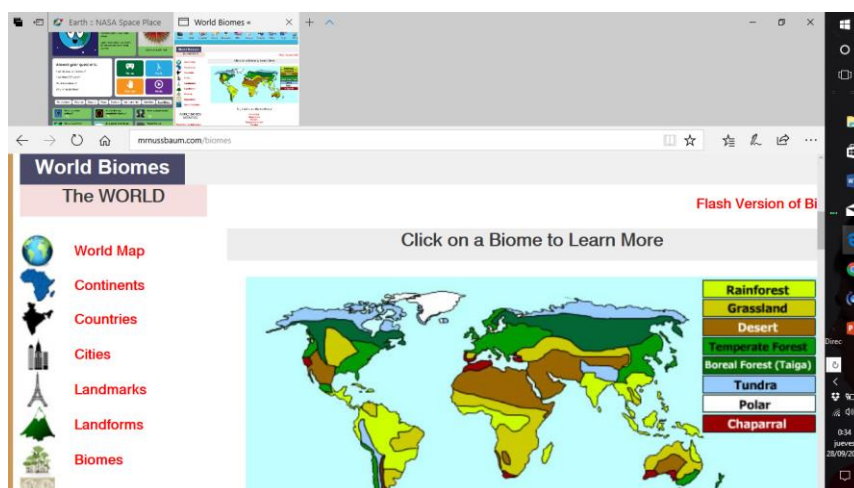

It is a good page to study the solar system in 4th grade of Primary.

- <http://mrnussbaum.com/>

The science section of MrNussbaum.com. is one of the largest collection of science interactives, explanations, generators, and activities for kids on the entire Internet. It is very intuitive to click on the links below to visit each sub-section.

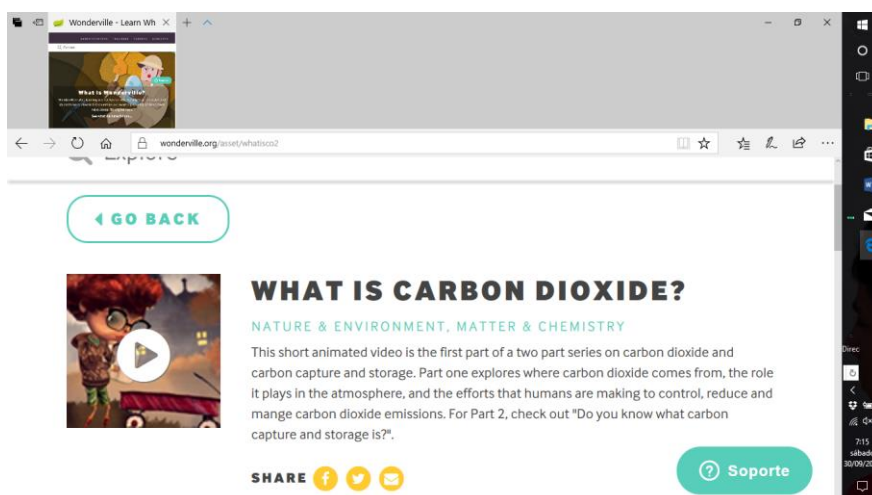

The MrNussbaum.com Biomes section features an interactive map in which learners can scroll over a world map and learn about each of the world's biomes as well as numerous interactive activities such as reading comprehension and multiple-choice question exercises, cloze reading exercises, word searches, games and much more.

- <https://wonderville.org/>

This website presents flexible, customizable lesson plans and assessments that turn Wonderville games and videos into deeper learning experiences. Since there is a close collaboration with a network of skilled experts to ensure, its content is both scientifically sound and engaging.

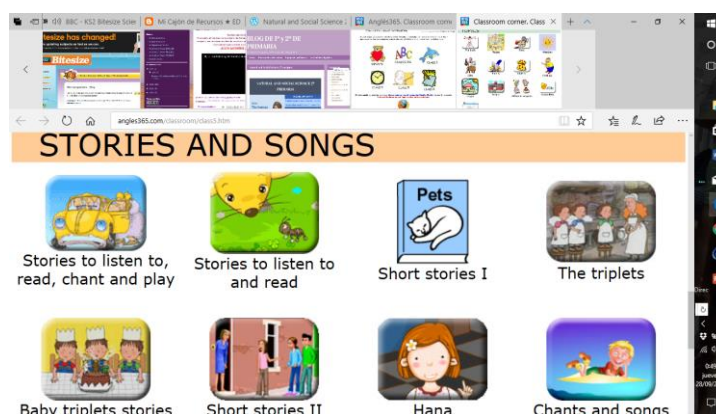

The Educators' Gateway is also home to a suite of classroom management tools that help individual and group performance at the click of a button. Wonderville is an excellent tool to introduce or reinforce concepts. It can also make it fun for students during home study review. It gives the teacher another added resource and helps reduce time spent on creating a lesson plan.

- <http://www.angles365.com/classroom/class5.htm>

This page is recommended to read stories or sing songs in class. The activities are classified into levels and there are other chapters dedicated to festivals such as Halloween.

It is very easy to play with and helps students listen and repeat vocabulary words. The lexical items are very basic connected to the topics students are familiar with: colours, numbers, family, school, food, etc.

- http://www.bbc.co.uk/schools/scienceclips/ages/7_8/teeth_eating.shtml

The Science Clips website is aimed at children aged 5-11 years old and their teachers. It accompanies the Science Clips TV series.

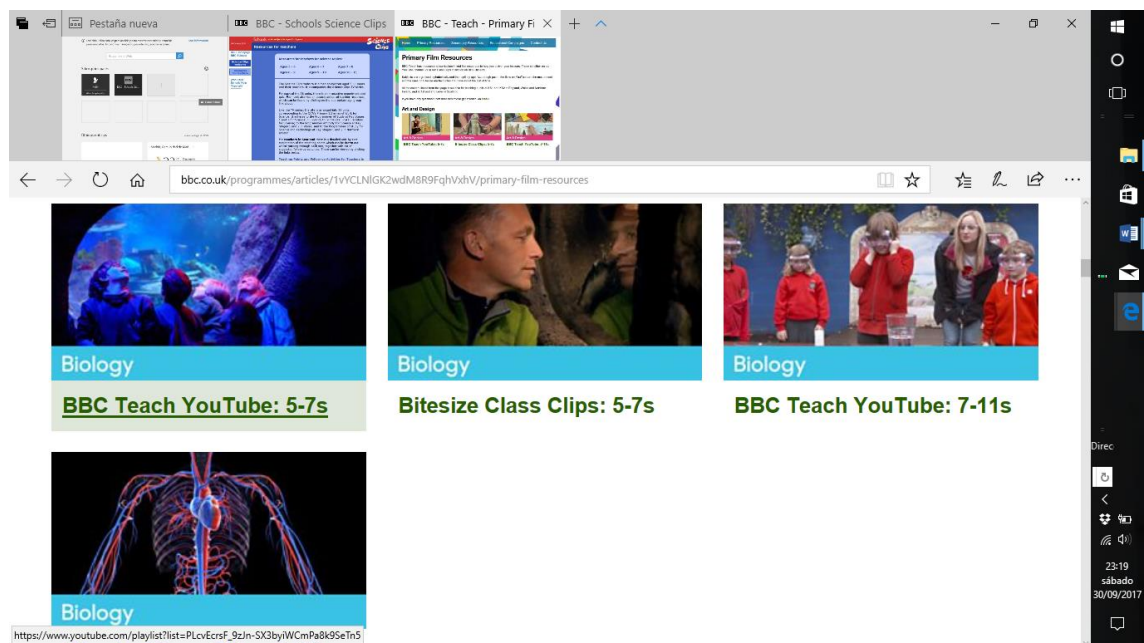

For each of the 36 units, there is an interactive experiment and quiz. Each unit also has an associated set of teacher resources, which can be found by clicking on the appropriate age group link above.

- <http://www.bbc.co.uk/programmes/articles/1vYCLNIGK2wdM8R9FqhVxhV/primary-film-resources>

BBC Teach has thousands of curriculum-linked film resources to help you deliver your lessons. These sit either on our YouTube channel, or in our Class Clips collection on BBC Bitesize.

Subjects are organised alphabetically and then split by age. The films on YouTube are the most recent and the ones on Bitesize are favourites that have stood the test of time. All the content linked from this page is suitable for teaching pupils in Primary Education.

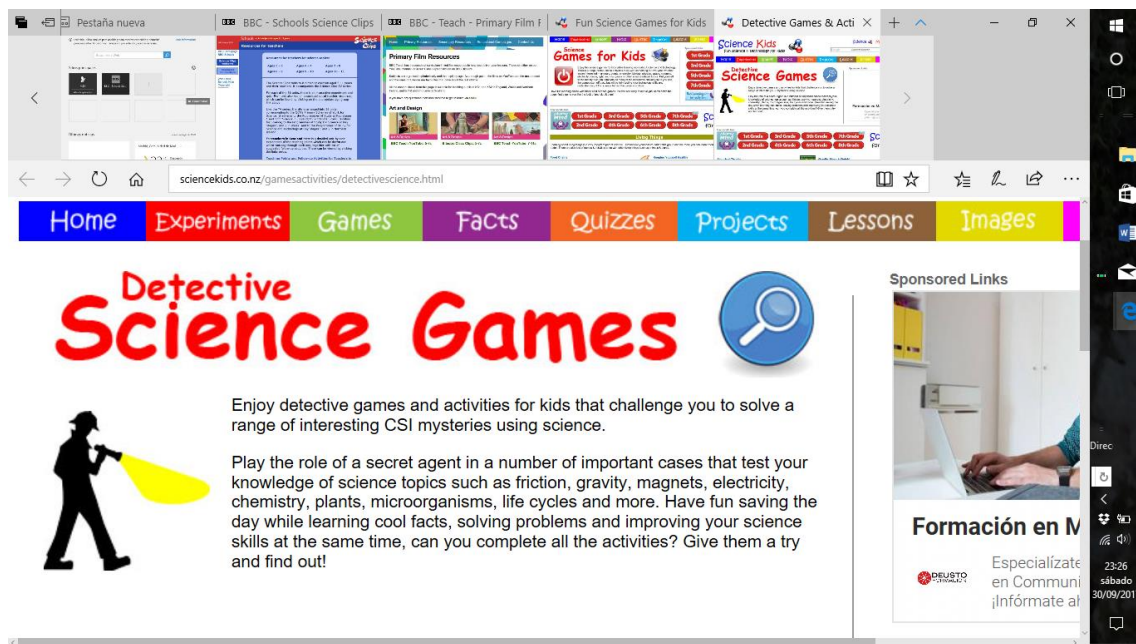

Teachers can also make a good use of blogs that exist from many teachers. Here are some examples of schools' blogs to see how other teachers work and share their ideas.

- <http://cajoneducatic.blogspot.com.es/p/webs.html>
- http://bogglesworldesl.com/esl_science.htm
- <http://teacheramparo.blogspot.com.es/search/label/Songs>

Science experiments for a science fair

Science is all about exploration, so check out some of these interesting websites, interactives, simulations, games and articles that we found.

To incorporate science experiments in primary school there are a lot of useful websites to find information from. Here there is a list of some of them.

<https://sciencebob.com/category/experiments/>

<http://www.sciencekids.co.nz/experiments.html>

<http://www.kidspot.com.au/things-to-do/collection/science-experiments>

<https://www.education.com/resources/activity+science-fair/>

<http://www.sciencekids.co.nz/gamesactivities/detectivescience.html>

<https://sites.google.com/a/clarke.k12.ga.us/earth-science/cool-science-websites>

<http://www.sciencekids.co.nz/gamesactivities.html>

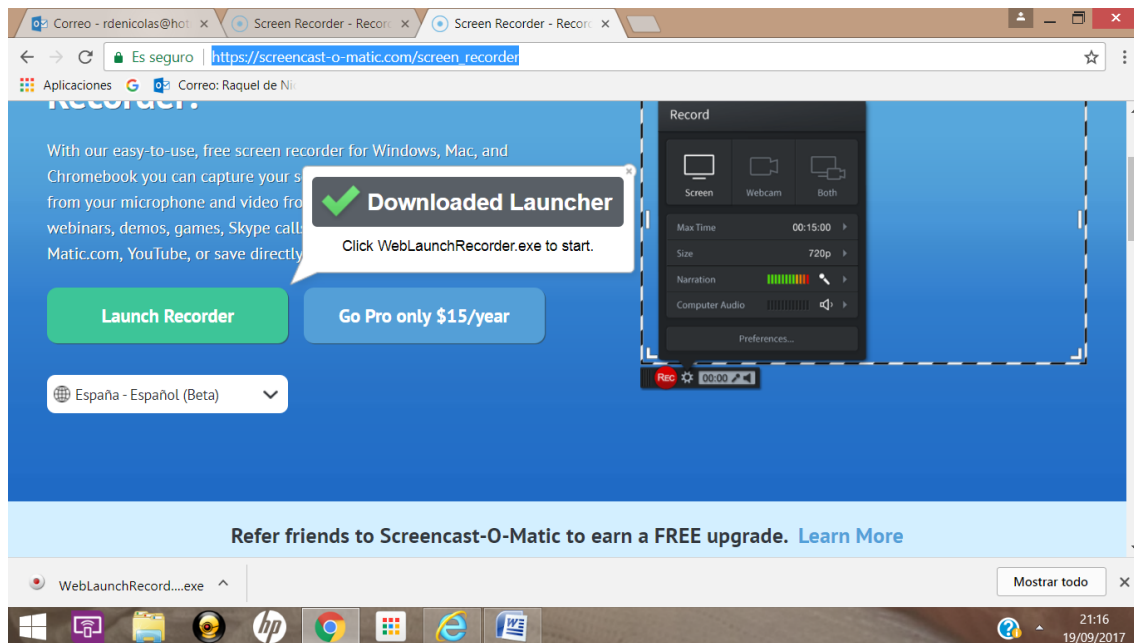

<https://www.education.com/activity/social-studies/>

Websites to create our own materials:

SCREENCAST:

This website allows you to create your own video recordings. It is very intuitive and user-friendly.

This is the link to download a free version of this site: **https://screencast-o-matic.com/screen_recorder**. On the screen, you click on "**Launch Recorder**" and the file called "**WebLaunchRecorder.exe**" will start to be downloaded. When this process finishes, you execute the installation file.

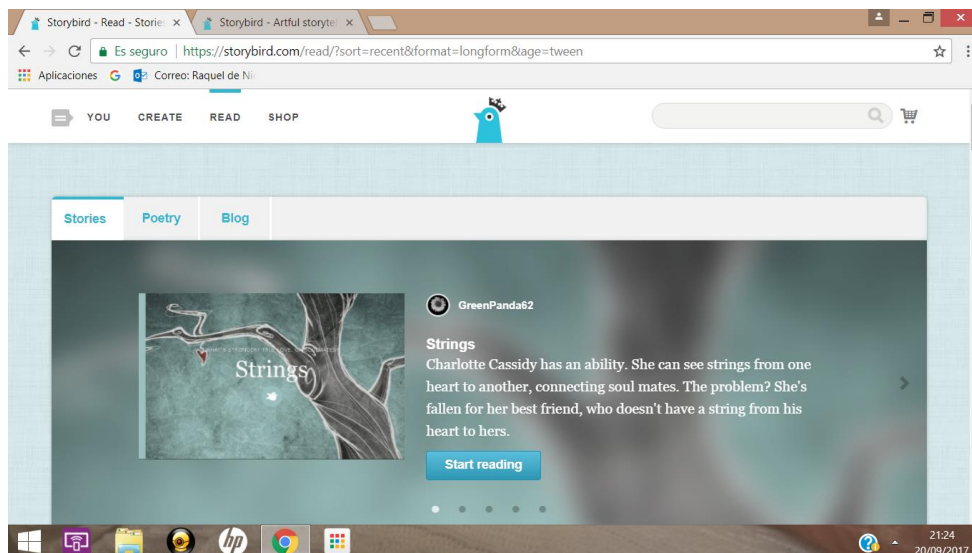

Once you have installed it, you can start recording your activities or lessons. You may use your computer webcam to appear on screen during your tutorial, or use a Powerpoint presentation, a book or a poster with your voice. You create your own files and they are ready to be uploaded onto Youtube or your blog.

STORYBIRD:

This website contains a lot of readings (picture books, longform stories and poetry) and you can also create your own stories.

This is the link to access the website and create your account:
<https://storybird.com>

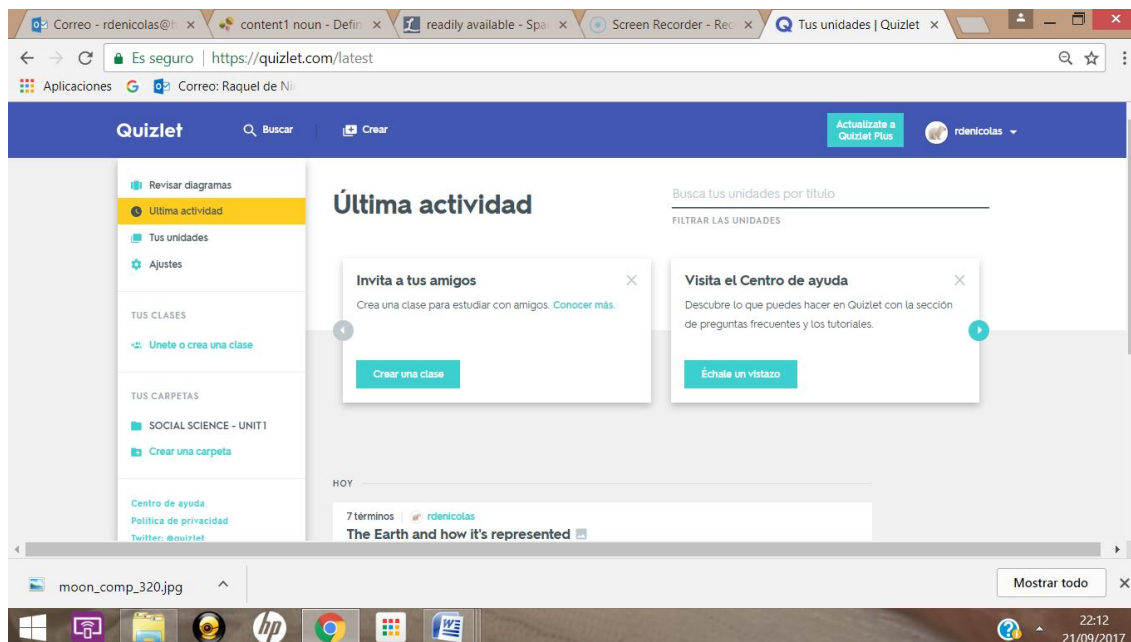

Once you have created your account, you can use any of the patterns available and start typing in your texts. Students can also write their own stories, which develops their imagination and creativity.

QUIZLET:

This website is thought to be used by teachers who want to create their own digital materials. This is the link to access the website and create your account: <https://quizlet.com>

Every unit you create includes a variety of activities such as flashcards, with definitions provided by the site itself and the option of writing your own; sound at different speed; tests with questions (multiple choice, true/false, etc.). You can group units together and put them into a file. Your students will be able to do the activities over and over again before and after the lesson.

SPELLING CITY:

This website offers a free subscription for a month and a premium membership for up to 25 students for 60 dollars a year. This is the link to it: <https://www.spellingcity.com>

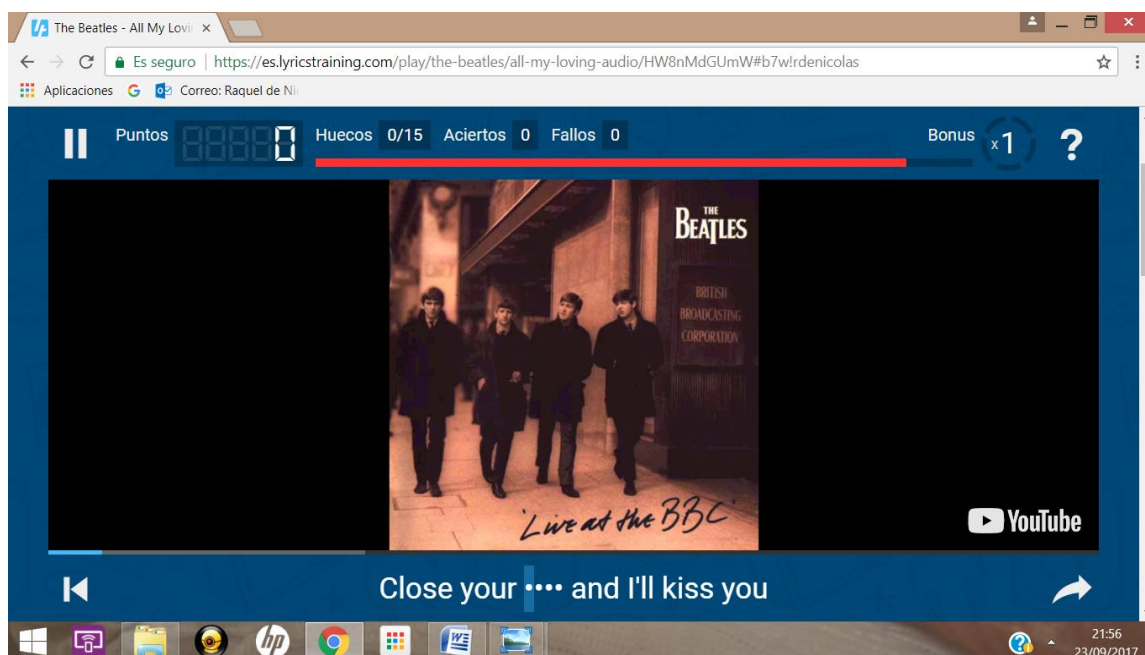

You can register as a teacher or as a parent. As a teacher, you need to create a school account. You click on the button that says "add a new school" and once you obtain your account, you can start writing your word lists. The site provides a wide variety of games to practise them. The activities include vocabulary, spelling, phonics and writing. Language arts is only available in the premium version.

LYRICSTRAINING:

This free website is perfect if you want to practise spelling through music. This is the link to it: <https://es.lyricstraining.com>

There is a wide range of songs available. You choose a song and select the level of difficulty (beginner, intermediate, advanced and expert). Students have to type in the missing words. Every dot of the missing word corresponds to a letter. The higher the level, the more words they need to type.

Conclusion

Motivation is like a little engine that makes us move in a certain direction. Engaging our students to work enthusiastically helps them to learn in a holistic way connecting mind and emotions. This way the learning is more meaningful and it helps to keep on building knowledge into the next step. Working with websites allows students to prepare their own quizzes for content reviews, to organize web quests looking for specific information and to improve the four linguistic skills in the foreign language.

Scaffolding and CLIL are two very useful techniques teachers may use when presenting a website in the bilingual programme of the Community of Madrid. Students learn better in a more interactive, manipulative, creative and motivational way.
